SIEMENS
Healthineers

What if you could increase both speed and precision for your echo exams?

Eyeball estimation of ejection fraction (EF) has **poor intra-operator reproducibility** with differences **up to 17.8%**¹

**80–95% of sonographers
worldwide experience
work-related pain²**

Growth of echo exams increased by **twice the rate** of the cardiology workforce over ten years^{3,4}

**Precise visualization,
measurements, and
efficiency are required
to drive outcomes and
success**

Expanding precision for the echo lab

The ACUSON SC2000 PRIME Ultrasound System

ACUSON SC2000 PRIME is an ultrasound system that provides you **workflow efficiency** and **precision** required at every step of the care pathway. You get the complete solution for the echo lab with the full suite¹ of imaging options and 1-click AI-powered applications² – enabling you to handle whatever comes your way.

Power of the platform

Pioneering 2D and 4D imaging technologies for more clinically relevant detail in every image.

Precision and speed for the echo lab

The most comprehensive suite of AI-powered applications.

The complete Structural Heart Disease solution

The only system on the market to offer 2D and 4D TTE and TEE, ICE, and TrueFusion³.

More relevant than ever before

Continuous improvements in image quality, IT and security, processing power, and ergonomics.

Pioneering 2D and 4D imaging technologies

for more clinically relevant detail in every image with ACUSON SC2000 PRIME

InFocus Coherent Technology

InFocus Coherent Technology synthesizes every pixel throughout the field of view for excellent spatial and temporal resolution.

True Fidelity Color Doppler

True Fidelity Color Doppler increases sensitivity and specificity while reducing color artifacts.

Contrast Pulse Sequencing (CPS)

Contrast Pulse Sequencing provides optimal tissue suppression and contrast visualization.

Leading in artificial intelligence and imaging

to bring you speed and precision in echocardiography

Siemens Healthineers has pioneered AI-Powered offerings since 1996. As of today, we have over 400 patents and applications in machine learning (with 100 in deep learning), more than 30 AI-enriched offerings on the market.

Our first AI-powered application for echocardiography was released in 2009. Today, the ACUSON SC2000 PRIME ultrasound system offers the most comprehensive suite of AI-powered applications¹ on the market to bring you speed and precision.

The most comprehensive suite of AI-powered applications on the market

	Clinical application	Transthoracic (TTE)	Transesophageal (TEE)
Routine echo	eSie Measure workflow acceleration B-mode	✓	
	eSie Measure workflow acceleration M-mode	✓	
	eSie Measure workflow acceleration Spectral Doppler	✓	✓
	eSie Left Heart measurement package	✓	
	eSie LVA volume LV analysis	✓	✓
Valvular regurgitation	eSie PISA volume analysis	✓	✓
	eSie Valves advanced analysis package		✓
	eSie LVA volume LV analysis	✓	✓
Interventional guidance	TrueFusion ¹		✓
	eSie Measure workflow acceleration Spectral Doppler	✓	✓
	eSie LVA volume LV analysis	✓	✓
	eSie Valves advanced analysis package		✓
	eSie PISA volume analysis	✓	✓

2D and 4D TTE and TEE, ICE and TrueFusion¹

only with the ACUSON SC2000 PRIME ultrasound system

2D TTE

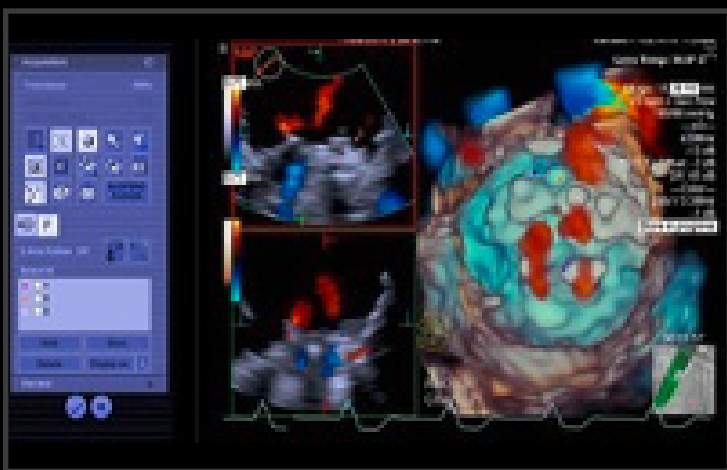

2D TEE

2D ICE

TrueFusion¹

4D TTE

4D TEE

3D ICE

Echo-fluoro guidance

Maximize system uptime with remote connected support

More relevant than ever before in the digital world

SRS (smart remote services) connects your medical equipment to our experts who provide you with proactive and interactive services caring for your running operations.

Remote Diagnosis & Repair

Immediate access to technical support
reducing labor costs by **> 50%¹**

Remote Assist

Real-time interaction with clinical application experts resulting in **faster incident resolution by > 80%¹**

Remote software updates

Remote installation of the latest software updates to protect against cyber threats

More relevant today than ever before

The ACUSON SC2000 PRIME today is completely different from just a few years ago

With ongoing investments in processing power and AI-powered applications as well as IT and security, the ACUSON SC2000 PRIME ultrasound system continues to revolutionize the world of echocardiography, expanding precision for the echo lab.

"As an enthusiastic user of the ACUSON SC2000, I am very satisfied with the latest release. It provides improved image quality and efficiency that I require for diagnostic TTE and TEE exams and interventional guidance for SHD procedures.

The 2D and 4D Volume TTE and TEE imaging enable visualization of pathology and lesions that I might not be able to see otherwise.

AI-powered applications allow me to get what I need in 1-click, greatly reducing variability, time and effort required for diagnostic measurements as well as guidance of SHD procedures.

eSie Lines and eSie Slice allow me to dissect and navigate within the 3D dataset with more precision.

The greatest benefit for me are new Single V and Dual V tools. Now I can precisely view and crop my region of interest in critical periods during intervention."

Dr. Nicolas Merke
Head of Echo Lab
Sana Klinikum Lichtenberg,
Berlin-Brandenburg

The products/features mentioned in this document may not be commercially available in all countries. Due to regulatory reasons their future availability cannot be guaranteed. Please contact your local Siemens Healthineers organization for further details. Standalone clinical images may have been cropped to better visualize pathology.

ACUSON SC2000, AcuNav, True Fidelity, TrueFusion, eSie Measure, eSie PISA, eSie LVA, eSie Valves, eSie Left Heart and eSie VVI are trademarks of Siemens Medical Solutions, USA, Inc.

SOUNDSTAR is a trademark of Biosense Webster, Inc.

AI-powered measurement tools consist of software applications leveraging machine learning-based Artificial Intelligence to achieve the intended outcome and include the eSie Measure workflow acceleration package, eSie Left Heart measurement package, eSie LVA volume LV analysis, eSie Valves advanced analysis package, eSie PISA and eSie Sync volume synchronization tool for TrueFusion.

At Siemens Healthineers, our purpose is to enable healthcare providers to increase value by empowering them on their journey towards expanding precision medicine, transforming care delivery, and improving patient experience, all enabled by digitalizing healthcare.

An estimated five million patients worldwide everyday benefit from our innovative technologies and services in the areas of diagnostic and therapeutic imaging, laboratory diagnostics and molecular medicine as well as digital health and enterprise services.

We’re a leading medical technology company with over 120 years of experience and 18,500 patents globally. With over 50,000 employees in more than 70 countries, we’ll continue to innovate and shape the future of healthcare.
